Yes! A way for visual learners to learn how to read and enjoy the Bible in Greek!

Devour these cartoons—and you will be equipped to read and understand 4 out of 5 words in the Greek New Testament! That is to say: 110,425 out of the 138,162 words in the book!

Introducing the Visual Greek™ System

featuring

#1 Lively cartoons for the 320 words that occur 50 or more times in the Greek New Testament

plus

#2 The Visual Greek Color System for Greek Text—it's like sentence diagramming yet much simpler, more compact, and a lot more fun!

plus

#3 Nerd and Company, a four-part cartoon, so much fun that you’ll likely never forget it!
   It delivers the noun, adjective, and pronoun endings; the definite article; the personal pronouns, and the relative pronouns (this is one amazing cartoon)

plus

#4 Sam and Pam, a four-part cartoon with "secret decoder ring" for reading Greek verbs—making the "scary and intimidating" no longer scary or intimidating

Chapter Numbers

The chapter numbers correspond to the chapter numbers in the most widely used introductory Biblical Greek text, Basics of Biblical Greek (BBG), Second Edition, by Bill Mounce.

The Visual Greek System is designed to be an accelerator for those using BBG, an ideal companion for that book.
# Contents, Part 4

This is a visual dictionary of those words that occur 50 or more times in the Greek NT, plus some additional companion words (as noted).

Why Visual Greek

People learn in appreciably different ways.

In the book *Frames of Mind*, Howard Gardner proposes that there are at least seven ways to express intelligence. He defines intelligence as the ability to produce something of value within a given cultural context. The seven intelligences are: linguistic, mathematical-logical, visual (spatial), musical, motion (bodily-kinesthetic), intrapersonal, and interpersonal. Most classrooms emphasize linguistic and mathematical-logical intelligence—and pay little attention to the others.

Now when it comes to learning a new language, those who are especially strong in linguistic intelligence have a relatively easy time. But those who learn visually—truly struggle.

The purpose of Visual Greek is this: *to build a path for the visual ones, so that they too might come to reading the New Testament scriptures in their original language.*

How can you tell if you are a visual learner? If you find it painfully difficult to listen to audio lecture recordings, if you find telephone calls far less fulfilling than talking in person, if you close your eyes while talking so you can better describe what you have in mind, if you find it hard to talk to someone if they keep moving around while you are talking to them, if you remember the name of someone you meet only if you also see their name in written form, and if you jump directly to the pictures in an owner’s manual rather than read word-for-word—if most or all of these statements describe you, then you are a visual learner.

*How to Get the Most from the Visual Greek Cartoons*

Here’s how to make the cartoons even more vivid in your mind, making them easier to remember. You’ll find that Visual Greek builds these same things into each cartoon, to assist you in these steps:

GEM: **G**ive it motion. **E**xaggerate something in it. **M**ake it funny.

Visual Greek also applies these principles:

- **Delete the unnecessary, so that the necessary may speak.**
  - Visual Greek uses simple backgrounds, preferring no background at all so the shapes of each cartoon “pops out” (we find that using busy backgrounds makes it harder to visually distinguish one cartoon from another).
  - Visual Greek uses gray and quieter colors to tone-down the less essential elements in a cartoon, making it easier to remember what’s important within a cartoon.

- **Don’t depend upon the ending sounds of verbs.**
  - We use cartoons that link to the basic sound of a verb, without depending upon the ending sound of the verb’s lexical form. We find this principle to be especially important for building a path so that a reader can read a specific form of a Greek verb and successfully remember (link back to) the corresponding cartoon for that verb.
About the Visual Greek Color-coding System

This book uses the Visual Greek Color-coding System. Each Greek word is color-coded by part-of-speech, making it so much easier for a reader to find his way in reading and understanding Greek words, phrases, and sentences.

Greek prepositions and conjunctions are green.

Greek verbs are red; their companions, adverbs, are underlined in red.

Greek nouns and pronouns are blue; their companions, adjectives, are underlined in blue.

Everything else (articles, particles, interjections, and contingency markers) is in black.

Some students use this same system when working on Greek homework or during a Greek exam. Here’s how to mark up a Greek text in color, in preparation for translating a phrase or sentence:

1. Underline prepositions and conjunctions in green.
2. Underline verbs in red; dash-underline adverbs in red.
3. Underline nouns and pronouns in blue; dash-underline adjectives in blue.

...ό θεός φῶς ἐστιν καὶ σκοτία ἐν αὐτ ὦκ ἐστιν οὐδεμία.

God is light and darkness is not in Him—none.
